Re: Status Report on Black Hills Mine, S/027/027, Millard County, Utah

Dear Mr. Feller:

On May 4, 1995, I performed an inspection of your Black Hills mine. As noted during the inspection, it was determined that the southern most pit (Black Hills 2) is no longer needed and therefore should be reclaimed by covering the disturbance with topsoil and reseeding. The preferred time for reseeding would be now (while the weather is cool and wet) or wait until late fall before the frost.

If you have any questions concerning this letter, please contact me. Thank you for your cooperation in doing concurrent reclamation of your mining operations.

Sincerely,

Tom Munson  
Reclamation Hydrologist
